

National Plan Training

Course Descriptions

CORE Training – Incident Management Team (IMT) Course

The Incident Management Team Course is designed for all marine pollution responders who could be expected to perform in a functional Management role during a marine pollution incident. The course runs for five days face-to-face and covers units of competency from the Public Safety Training Package.

- PUAOIL401 Decision making strategies in an oil spill response
- PUASES012A Work as a team member in an Emergency Response Centre

As the Incident Management Team course is competency based training participants will be required to complete assessments during the course, and also post course.

SPECIALIST Training – Incident Controller Course:

The Incident Controller Course is designed for marine pollution responders who would be expected to perform in the role of Incident Controller during a marine pollution incident or who aspire to perform in this role in the future. There are two courses for Incident Controllers, which both run for five days face-to-face and cover units of competency from the Public Safety Training Package. The Incident Controller Level 2 course is a pre-requisite for the Incident Controller Level 3 course.

Incident Controller Level 3

- PUAOPE019A Control a Level 3 incident

Incident Controller Level 2

- PUAOPE018A Control a Level 2 incident

As the Incident Controller courses are competency based training participants will be required to complete assessments during the course and post course.

SPECIALIST Training – Planning course

The Planning Course is designed for marine pollution responders who would be expected to perform in the role of a Planning Officer during a marine pollution incident, or who aspire to perform this role in the future. The course runs for five days face-to-face and covers a unit of competency from the Public Safety Training Package.

- PUAOPE025A Manage planning for a Level 2 incident

As the Planning Course is competency based training participants will be required to complete assessments during the course and post-course.

SPECIALIST training – Operations course

The Operations Course is designed for marine pollution responders who would be expected to perform in the role of an Operations Officer during a marine pollution incident or who aspire to perform this role in the future. The course runs for five days face-to-face and covers units of competency from the Public Safety Training Package.

- PUAOPE023A Manage Operations for a Level 2 incident
- PUAOPE024A Manage Operations for a Level 3 incident

As the Operations Course is competency based training participants will be required to complete assessments during the course and also post course.

SPECIALIST Training – Logistics course

The Logistics Course is designed for marine pollution responders who would be expected to perform in the role of Logistics Officer during a marine pollution incident, or who aspire to perform in this role in the future. The course runs for five days face-to-face and covers units of competency from the Public Training Package and the Public Sector Training Package.

- PUAOPE022A Manage Logistics for a Level 2 incident
- PSPPCM001 Carry out basic procurement

As the Logistics Course is competency based participants will be required to complete assessments during the course and also post course.
